LFSystems partners with Colby Equipment

By RM Manifold Group

Fort Worth, TX, October 1st [RM Manifold Group](#) is proud to announce an exclusive territory partnership with Colby Equipment, a manufacturer sales representative serving engineers, contractors, and building owners throughout Indiana for nearly 100 years.

Known for their expertise in industrial and commercial air handling equipment, Colby Equipment has built a strong reputation by combining quality products, responsive service, and deep technical knowledge. Through this partnership, Colby Equipment joins [RM Manifold Group](#)'s growing network of professional sales organizations representing **LFSystems**, providing kitchen, bath and laundry exhaust controls for multi-story buildings and stairwell/hoistway pressurization controls for smoke control.

"Colby Equipment has been a trusted partner of ours for years, known for responsiveness, strong contractor relationships, and consistent engagement with specifying engineers," said Tim Rothgeb, President of RM Manifold. "For more than nine decades, Colby Equipment's team has built a remarkable reputation as a trusted resource throughout the market. We are proud to welcome them into our national network and look forward to building on that legacy together."

Nick Colby, President of Colby Equipment, also shared his thoughts on the partnership: "We are very excited about representing LFSystems in the Indiana market. This partnership allows Colby Equipment to expand its product offerings to better serve our customers. By combining LFSystems' advanced engineering and innovative designs with our strong regional relationships, we can provide effective solutions to our customers' challenges."

For decades, Colby Equipment has supported customers in overcoming complex HVAC system issues through their expertise, reliable service, and established relationships. As part of RM Manifold's national sales network, Colby Equipment gains access to industry leading technical resources and industry knowledge of pressure-based draft controls while continuing to provide the local support and responsiveness customers have come to expect.

PRESS RELEASE

About RM Manifold Group

RM Manifold is a Fort Worth-based manufacturer that produces pressure based draft controls, as well as engineered airflow and venting solutions. Our company manufactures chimney draft controls, chimney fans, laundry exhaust systems, supply-air solutions, and stairwell pressurization controls, and also serves as the exclusive North American distributor for Kutzner + Weber chimney fans and accessories.

The products we make primarily support consulting engineers, mechanical contractors, commercial laundry operators, multi-family developers, and HVAC/ventilation professionals who design, specify, and install airflow, exhaust, and life-safety systems in residential, commercial, and industrial buildings.
